3M™ Nomad™ Carpet Matting removes more dirt and water than other carpet matting.

3M™ Nomad™ Scraper Matting removes up to 72% more dirt than other types of entrance matting.

3M™ Nomad™ Entrance Matting System

The 3M™ Nomad™ Entrance Matting System is not just a mat. It's a system. Each mat in the system does a specific job. 3M™ Nomad™ Scraper Matting (vinyl loop) traps dirt before it gets in the building. 3M™ Nomad™ Carpet Matting—designed for indoor use—captures moisture and dirt particles not removed by outdoor matting.

Different mats for specific jobs

3M™ Scraper Matting

- Removes up to 72% more dirt than other types of entrance matting
- Resilient vinyl loops scrape dirt and moisture off shoes
- Coiled loop construction effectively traps and hides dirt
- Dirt and water can easily be removed by shaking, vacuuming or rinsing

3M™ Carpet Matting

- Patented dual-fiber design:
  - coarse polypropylene fibers scrape, remove and hide small soil particles
  - fine looped nylon or polypropylene fibers wick away water
- Specially crimped fibers help keep the mat from crushing and trap dirt and water
- Remove dirt and water as you would for any carpet—through vacuuming and periodic extraction

3M™ Entrance Matting

Entryway mats are a great option because they stop dirt that would otherwise have to be cleaned up all over the building. Consider that 80-90% of dirt inside a building comes in on people's feet. Mats can increase the life of floor finishes and reduce the need for polishing or burnishing. Mats can extend the life of carpeting and reduce the need for wet cleaning. Rubber mats are a greener, more natural choice than vinyl.

More Tips To Consider Before You Buy:

POWER CORD:
Cordless varieties or models with extra long cords will allow you to move freely from room to room without having to unplug and switch power sources. Quick cord releases make getting started and storing your vacuum away when finished easier.

CLEANING PATH:
Vacuums with wider cleaning paths will save time and increase productivity while cleaning.

VACUUM PERFORMANCE:
Two important ways to measure vacuum performance are airflow (CFM) and lift (in).

FILTERS:
For optimal vacuum operation, check your filters frequently. For allergen-sensitive areas like hospitals, schools or doctor's offices, HEPA filtration systems are highly recommended.

BAG REPLACEMENT:
As the bag fills, less air flows out and the cleaning performance of your vacuum reduces. It is very important to replace or empty bags when they are full.

ATTACHMENTS:
You can find a variety of tools and accessories for your vacuum. Be sure to select compatible tools, filters and accessories that address your specific needs best.
